## Installation

First step to join Storage Analyzer is to download solution from [uds.system](https://uds.system) webpage.

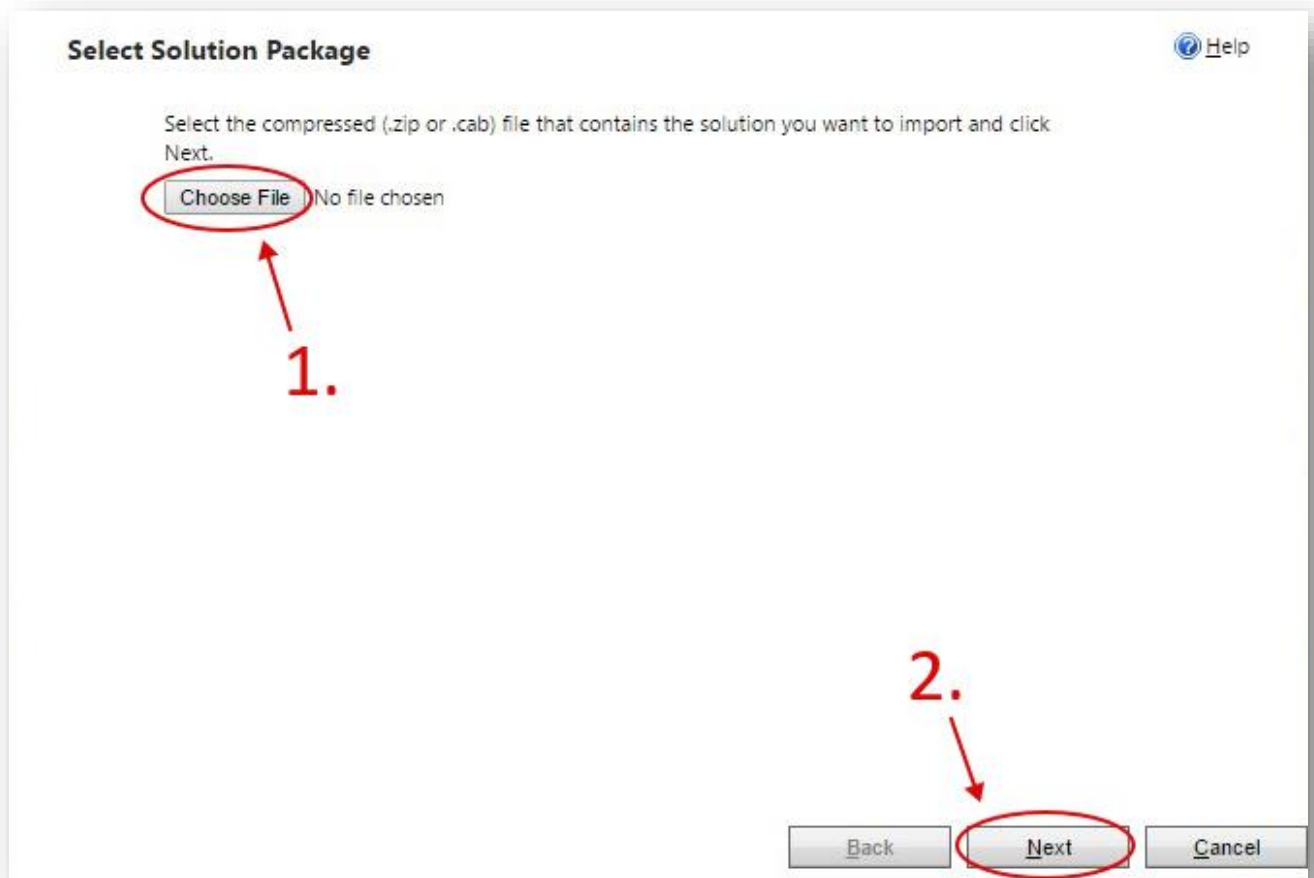

After you download solution to your computer you should import .zip file to your CRM system. Navigate to **Settings(2.)**> **Solutions(3.)**.

On Solutions page click on **Import** button

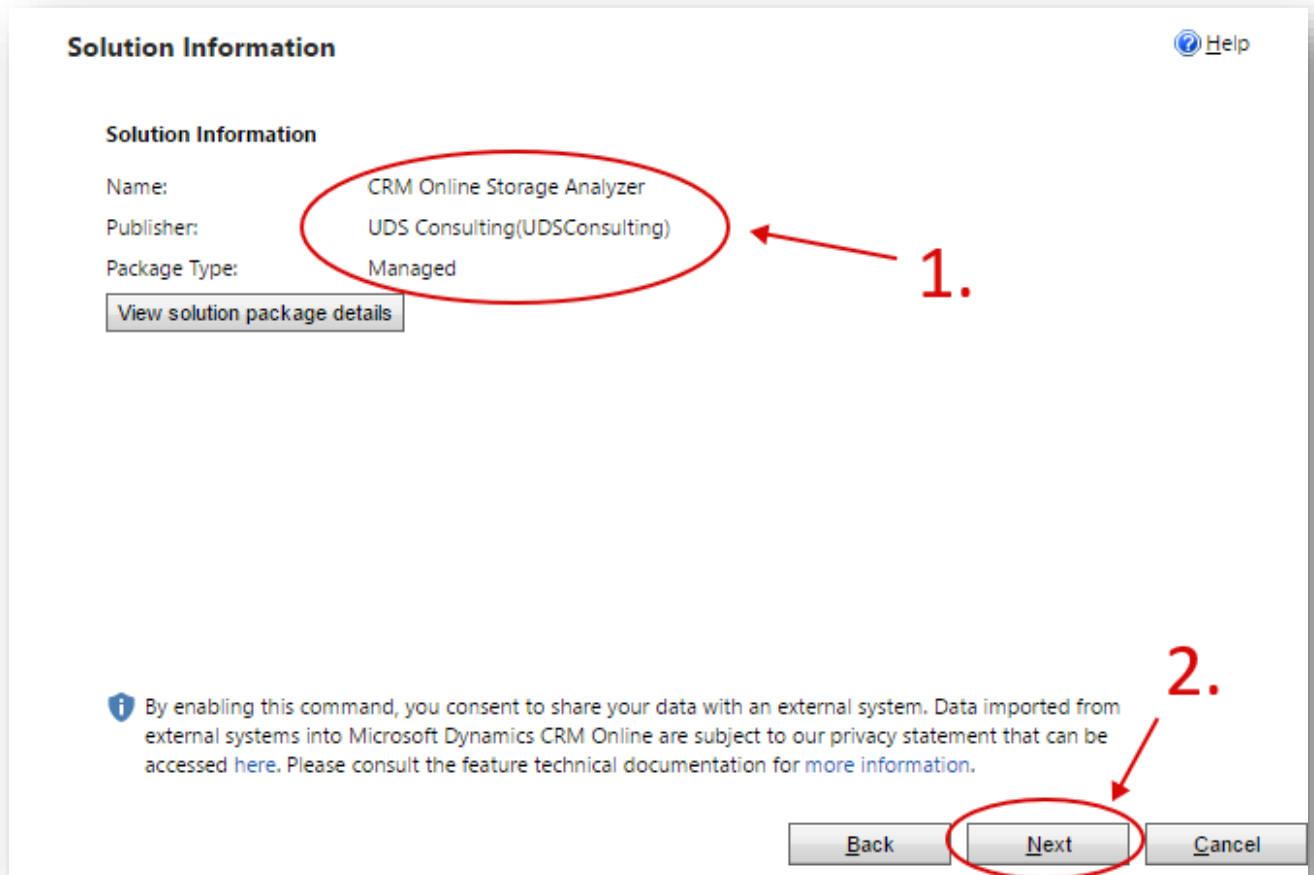

After you clicked on Import button on Solutions page pop-up window Select Solution Package will appear

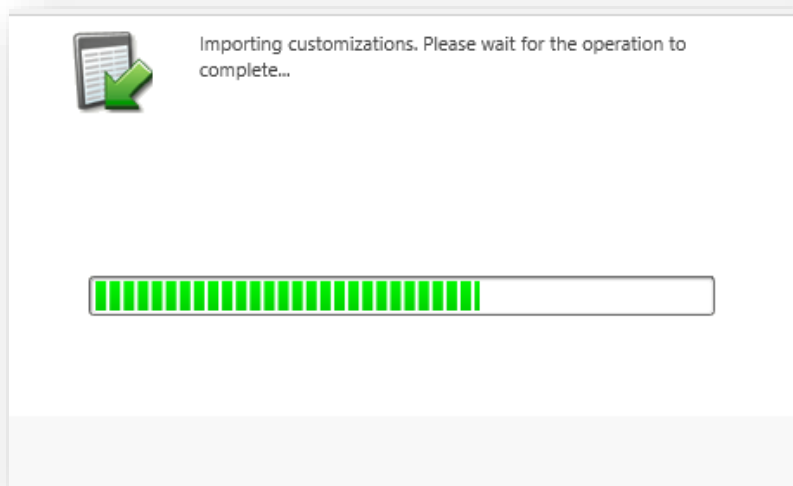

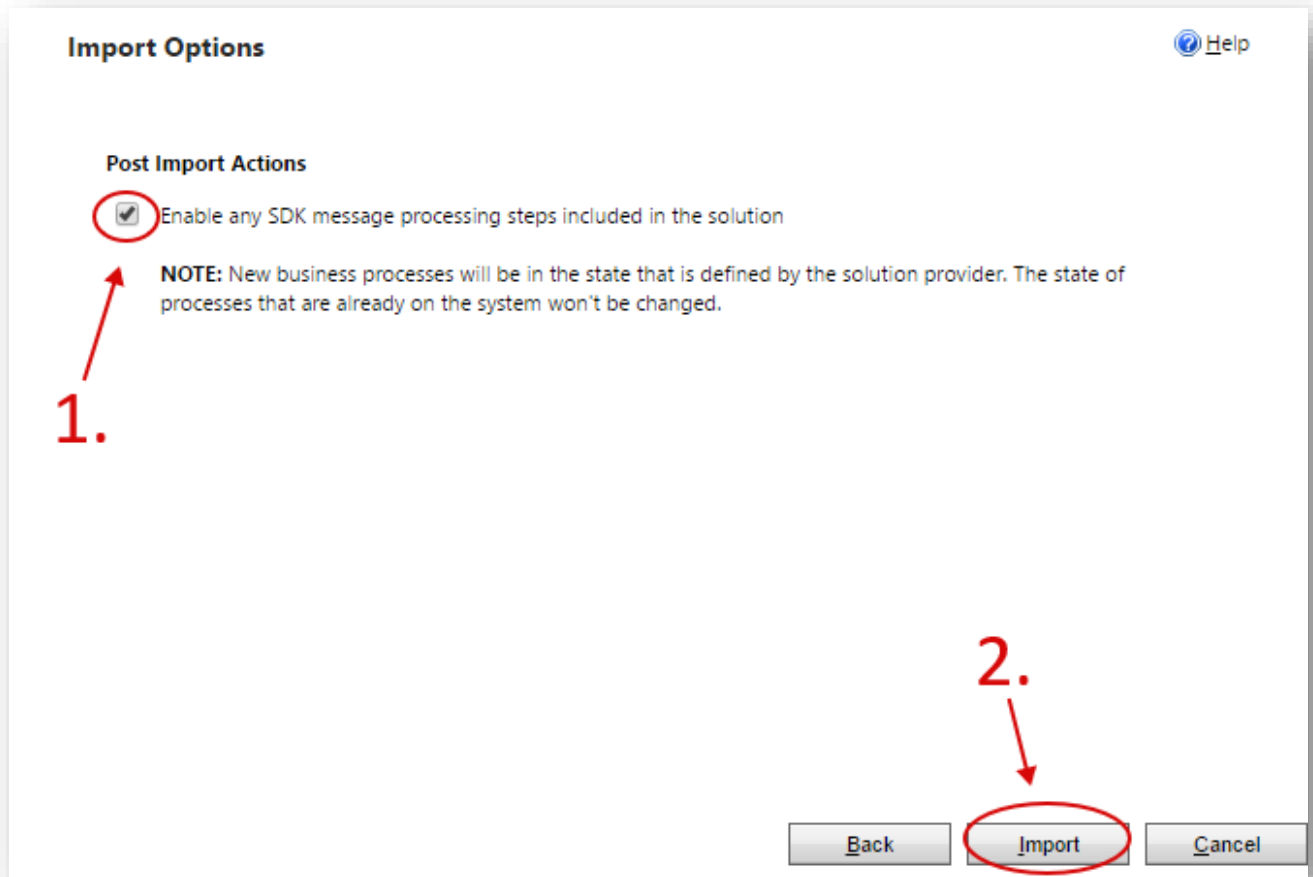

On pop-up window you should select .zip file that was downloaded in previous step and click Next button.

The next pop-up window will show the Name / Publisher / Package Type of the solution you are installing. This screen should show Name **CRM Online Storage Analyzer** from Publisher **UDS Consulting**.

Verify **Solution Information**(1.) and click on **Next**(2.) button

Make sure that **Enable any SDK message processing steps are included into solution**(1.) checkbox is selected and click on **Import**(2.) button.

After you clicked on **Import** button, you will see the progress bar of the installation.

After finish of the uploading you will see the pop-up with yellow bar on the top (1.). It means that installation was completed successfully. Click on **Close**(2.) button.

**Importing Solution** Help

**i** The import of solution: CRM Online Storage Analyzer completed successfully.
